CAREER OBJECTIVE

Motivated Computer Science Engineering student with hands-on experience in building Java-based web applications using Spring, Spring Boot, Servlets, Hibernate, and MySQL following MVC architecture. Seeking an opportunity to start my career as a Java Developer where I can apply my technical skills, contribute to real-world projects, and continuously enhance my knowledge.

EDUCATION

Rao Bahadur Y. Mahabaleswarappa Engineering College

Nov 2022 – Jul 2026

B.E. in Computer Science and Engineering (CGPA: 7.37)

Ballari, Karnataka

TECHNICAL SKILLS

Languages & Core : Core Java, OOP, Exception Handling, Collections Framework, JavaScript (ES6+)

Frontend : React.js, HTML5, CSS3, Responsive Web Design

Backend : Spring Framework, Spring Boot, Spring Security, Spring AI, Hibernate, Servlets, JSP, JDBC

Database : MySQL, SQL, Database Management

API & Testing : REST API Design, API Integration, Postman

INTERNSHIP

Java Full Stack Developer Intern | JSpiders, Rajajinagar, Bangalore 📍*

Feb 2026 – May 2026

- Engineered full-stack web applications using Java, Spring Boot, React.js, and MySQL, following MVC architecture and SDLC best practices.
- Built and tested secure RESTful APIs using Spring Boot, Hibernate, and Postman for seamless frontend-backend integration.
- Developed server-side logic using Servlets, JSP, and JDBC to handle dynamic requests and optimize database operations.
- Implemented Spring Security features for user authentication and debugged end-to-end issues to enhance application reliability.

PROJECTS

Student Management System 📍* | Java , Spring Boot , Spring MVC , Spring Data JPA , Hibernate, Thymeleaf , MySQL

- Developed a full-stack Student Management System using Spring Boot with a layered MVC architecture (Controller, Service, Repository, Entity).
- Implemented complete CRUD functionality using Spring Data JPA and Hibernate for efficient MySQL database management.
- Designed responsive user interfaces with Thymeleaf and Bootstrap, enabling dynamic form handling and server-side rendering.
- Applied dependency injection and clean architecture principles to build a maintainable and scalable application.
- Streamlined database operations through JPA Repository, reducing boilerplate SQL and improving code maintainability.

Employee Management System 📍* | React.js, Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, REST APIs, Axios

- Developed a full-stack Employee Management System using React.js for the frontend and Spring Boot for the backend, enabling end-to-end employee management.
- Implemented RESTful CRUD APIs with Spring Data JPA and Hibernate for efficient employee record management in MySQL.
- Integrated React Router and Axios to provide seamless navigation and real-time communication between the frontend and backend.
- Built reusable React components for listing, creating, updating, viewing, and deleting employee records with a responsive Bootstrap-based UI.
- Implemented custom exception handling using ResourceNotFoundException to return meaningful 404 responses for invalid employee requests.

Personal Portfolio Website 📍* | HTML5, CSS3, JavaScript, FormSubmit

- Built a responsive portfolio using HTML5, CSS3, Flexbox, and Grid to showcase projects and skills.
- Implemented interactive JS features, including typewriter effects, mobile nav, and scroll progress tracking.
- Integrated FormSubmit to route contact form entries directly to email without a backend.
- Optimized layout for cross-device responsiveness with direct links to live projects and GitHub.
